SUMMARY

Senior Software Engineer with 2+ years of experience building back-end services, APIs and cloud infrastructure for an institutional risk, margin and digital-asset platform. Skilled in Java, Spring Boot, Node.js, React and AWS, with hands-on work in system design, blockchain integrations and release management.

EXPERIENCE

ZeroBeta (Pvt) Ltd – *Colombo, Sri Lanka (Hybrid)* Nov 2024 – Present

Senior Software Engineer ***Jan 2026 – Present***

Software Engineer ***Nov 2024 – Dec 2025***

Tech: Java, Spring Boot, JavaScript, Node.js, React, Next.js, Python, REST, Apache Kafka, WebSockets, AWS, Terraform, Docker, Helm, Kubernetes, Datadog

Domain: Digital-asset staking, risk & margin (ISDA SIMM), tokenisation, capital markets

- Shape architecture and system design decisions for new features and platform services
- Serve as release manager for multiple releases, coordinating technical delivery and deployments and preparing release notes
- Design and build back-end services and APIs for a risk, margin and digital-asset platform, owning features end to end
- Integrate the platform with external client systems and blockchain networks through secure REST APIs and webhooks
- Develop risk and margin modules, and staking and reconciliation services for Ethereum, Solana and Cardano
- Implement new widget layouts for real-time dashboards
- Improve AWS infrastructure and reliability with Terraform, Docker, Helm, Datadog monitoring and caching
- Collaborate with QA, DevOps and product teams in agile sprints to plan and deliver features
- Review code and support teammates on technical problems

ISA – *Colombo, Sri Lanka (On-site)* Aug 2023 – Dec 2023

Software Engineering Intern

- Built features in a microservice architecture using Java, Spring Boot, React, PostgreSQL, Hibernate, Apache Kafka and gRPC
- Wrote unit tests, fixed bugs and took part in code reviews in agile sprints

PROJECTS

Automated Medical Image Annotation | *Python, Machine Learning* | Repo Website 2024

- Final-year research: trained a self-supervised few-shot semantic segmentation model on dental images to segment from a few user-annotated samples, with text prompting

Cinema Ticket Reservation App | *Java, Spring Boot, React, PostgreSQL, Kafka* | Repo 2023

- Built microservices for cinema profiles, movie management, seat inventory per showtime, and reservation validation and confirmation

Corals Protector | *React, Node.js, MongoDB, Express.js, AWS* | Repo 2023

- Built the front end of a web app analysing human impact on coral growth, deployed on AWS EC2 with controlled data access

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL, HTML, CSS
Frameworks: Spring Boot, Node.js, React, Next.js, Express.js, Flutter
Databases & Caching: MySQL, Redis, PostgreSQL, MongoDB, Firebase / Firestore
Messaging & APIs: REST, Apache Kafka, Webhooks, WebSockets, gRPC
Cloud & DevOps: AWS, Terraform, Docker, Kubernetes, Helm, Jenkins, CI/CD, Linux, Datadog
Tools: Git, GitHub, Bitbucket, Jira, K9s, Postman, Gradle, Maven, Kibana

EDUCATION

University of Peradeniya Peradeniya, Sri Lanka

B.Sc. Engineering (Hons) in Computer Engineering – GPA 3.25/4.00 *Dec 2019 – Aug 2024*

ACHIEVEMENTS

Winners, HackFest 2022 – ACES, University of Peradeniya
Runners-up, ACES Hackathon 2023 – University of Peradeniya
